## Description

The SCR series is a universal lamp alarm relay designed to sense the failure of flashing or steady incandescent beacon lamps or steady side lights. The toroidal current sensor provides isolation and allows monitoring of more than one line at a time. The SCR Series energizes when one or more lamps fail. It will monitor the operation of one to four side lights and up to four beacon lamps.
Operation
When a lamp fails, the SCR Series senses a decrease in current flow. After a fixed time delay, the LED glows and the two alarm outputs energize. The outputs and the LED are reset when the failed lamps are replaced and the current returns to the nominal setting, or when the input voltage is removed. The SCR will sense an open flasher, it will not sense a continuously ON flasher (see FB Series).

## Features \& Benefits

| FEATURES | BENEFITS |
| :---: | :---: |
| Toroidal current sensing | Provides isolation from the lighting circuit and allows monitoring of multiple lines simultaneously |
| Monitors 1-4 side lights or up to 4 beacon lamps | Senses failed incandescent flashing beacon or steady obstruction lamps |
| Isolated, 10A, SPDT alarm output plus one 1A, solid-state line voltage alarm output | Provides alarm indication and can also be used for remote monitoring of the lighting system |
| Fixed trip delay (6s) | Prevents nuisance alarms |
| Switch selectable number, voltage, and wattage of lamps | User selectable to meet wide application needs with one relay |

## Ordering Information

| MODEL | INPUT | LAMP TYPE |
| :--- | :--- | :--- |
| SCR430T | 120VAC | Incandescent |
| SCR630T | 230VAC | Incandescent |

## SCR SERIES

## Selection Range

a. Lamp Wattage - Select the lamp wattage of the lamps in use.
b. Lamp Voltage - Select the lamp voltage shown on the lamp (SCR430T)
c. Lamps ON - Select the number of lamps on during normal operation. Only one lamp switch at a time may be transferred to the right.

## Programming Example

Example Shown: SCR430T-620 watts at 120 VAC lamps, two lamps are ON during normal operation.

## STEP

1. Select lamp wattage: 116 or 620 watts
2. Select the number of lamps ON (1 thru 4) during normal operation. Only one lamp switch may be ON (RIGHT) at any time.
